

VSR-TD12 TURN DISK

With the TD12, use 2 Straight Conveyors, instead of a Curved Conveyor, to make a 90° Turn!

Benefits:

- Turn Disks are easier to setup and adjust than Curved Conveyors.
- Adjusts to a wide variety of containers.
- Offers a tight turn radius to save valuable line space.
- Adjustable speed motor can be matched to your line speed.
- Left or Right Turn Configurable.

A Turn for the Better!

Containers Exit at 90 Degrees!

Note: Conveyors sold separately

The logo graphic consists of three white, curved lines of varying lengths and positions, suggesting a stylized wave or a dynamic shape. The top line is the longest and curves from left to right. Below it, two shorter lines curve in a similar direction, creating a sense of movement and depth.
